

# Schuko Mains Adapter

## MA-10A

When you're working with electrical engineering, especially with mains applications, you need a Mains Adapter. Our Mains Adapter MA-10A is a very handy, practical and simple to use tool.

- **10 A current capacity**
- **Quick detection of mains voltage** through built-in pilot lamps
- **Detection of L/N polarity** through built-in pilot lamps
- **Built-in ON/OFF Switch with pilot lamp** for visual detection of present mains voltage and for double-pole load connection/disconnection
- **Connection of test instrument** like V-meter directly to mains terminals without interruption of mains supply
- **Measurement of mains voltages UL/N, UL/PE and UN/PE** with an external V-meter
- **Measurement of Load Current** with an external A-meter or Clamp-meter
- **Measurement of Load Power** in combination with an external Power-meter

### TECHNICAL DATA

Input / Output Voltage	230/240 V, 50 Hz
Maximum Continuous Input Current	10 A
Maximum Continuous Output Current	10 A
Fuse built-in	No
Dimensions (W × D × H)	120 × 65 × 55 mm (55 mm without mains plug)
Weight	0,25 kg
